Project Abstract Submission Form

Sec No- 3	Team No- 18	Project Title-Society/Apartment Management Portal

1. Abstract

The Society/Apartment Management Portal is a web-based application designed to simplify and digitize the day-to-day operations of residential societies and apartment communities. The system provides a centralized platform for residents and administrators to efficiently manage essential society activities, reducing manual work and improving communication.

The portal includes features such as resident and flat management, maintenance billing and online payments, visitor management, gate pass generation, complaint registration and tracking, and amenity booking. It also provides notice board and polling facilities to improve interaction between residents and society management. Push notifications can be used to keep residents informed about important updates, payments, bookings, and announcements.

The application is developed using React.js for the frontend and Node.js with Express.js for backend services, with MySQL used for data storage. Razorpay integration enables secure online payment processing, while Firebase Cloud Messaging (FCM) supports real-time notifications. The system aims to provide a secure, user-friendly, and efficient solution for managing residential society operations through a single digital platform.

2. Team Details

Roll Number(s)	Name of the Student	Signature
2520030008	Sagi Sahasra Srihasa	
2520030011	Pamarthy Tejaswini	

3. Frameworks / Platforms / Software Used

Frontend: React.js, HTML, CSS, JavaScript
Backend: Node.js, Express.js
Database: MySQL
Development Tools: Visual Studio Code, Git, GitHub
API Testing: Postman
